

Water Literate Leaders Class 2017-2018

Book Reading Assignment

We promised you a reading list, and you will find it on the CLASS tab of our website—

<http://waterliterateleaders.colostate.edu/Home/Class>

Each of you should choose a book or other selection from the reading list or some other source, pertinent to our course, to read and report to the class about. Your report should be about one page long, submitted to the class ahead of time, answering these questions:

- What did you get out of this book?
- Would you recommend it to class members?
- What 3-5 key points would you like to discuss with the class?

We will set aside 30 minutes at each class session to discuss the books class participants read—3 participants/class, 10 minutes discussion per book. Please indicate below which month you would like to discuss your book with the group. We need for you to send us your report no later than the first day of the month of the class session so that class members can read your report ahead of time and be ready for discussion.

December (written report due by December 1)

1. The Water Problem: Climate Change and Water Policy in the U.S.—Troy Jones
2. Beyond the 100th Meridian—Carol Cochran
